## PROFESSIONAL SUMMARY

Computer Science undergraduate at the National University of Sciences and Technology (NUST) who ships production software across web, backend, and desktop systems. Founded Stayza (stayza.pk) in April 2026 and built its React, TypeScript, and Supabase-based platform through to public launch, while leading hiring and customer discovery from the ground up. Growing toward backend engineering and distributed systems roles through independent full-stack and desktop projects.

## TECHNICAL SKILLS

**Programming Languages:** Python, Java, C++, JavaScript, TypeScript, SQL

**Frameworks & Libraries:** React, FastAPI, Flutter, Tauri, JavaFX, Java Swing, Hibernate, Tailwind CSS, TanStack Start

**Databases:** PostgreSQL, Supabase, MariaDB, MySQL, SQLite, Firebase

**Developer Tools:** Git, GitHub, Linux, Vite, Vercel, Maven, npm, XAMPP

**Concepts:** Object-Oriented Programming, Database Design & Normalization, MVC & Service-Oriented Architecture, REST APIs, Authentication & Authorization, ORM, Design Patterns, Client-Server Architecture

## PROFESSIONAL EXPERIENCE

**Founder & CEO — Stayza (stayza.pk)** *Islamabad, Pakistan | April 2026 – Present*

- Founded Stayza and led the product from concept to public launch at stayza.pk.
- Built and shipped the platform using React, TypeScript, Vite, and Supabase.
- Screened 50+ resumes and conducted 10+ interviews to build and onboard a 10-person intern team across business development, QA, and social media/content creation.
- Ran 10+ customer meetings to guide product decisions ahead of launch.
- Led pre-launch QA audits that surfaced and resolved multiple SEO-related issues.

**Web Development Intern — MarketBrainsCo** *July 2026 — September 2026*

- Contributed to web development tasks and site improvements alongside the development team.
- Collaborated on feature builds and technical tasks throughout the internship.

## KEY PROJECTS

**JARVIS OS — Python, React, Tauri, SQLite** *Archived*

- Built a modular desktop assistant featuring local voice interaction and database management.
- Designed the system architecture, backend services, and desktop integration; implemented the voice pipeline.

**Raabta AI — Flutter, FastAPI, Firebase** *Prototype*

[github.com/rehmanoncloud9/raabta-ai](https://github.com/rehmanoncloud9/raabta-ai)

- Developed a multilingual service marketplace app in a two-person team during the Google Antigravity Hackathon.
- Engineered backend APIs, the booking workflow, authentication, and Firebase data structure.

**Crime Management System — Java, JavaFX, Hibernate, MariaDB** *Completed*

[github.com/rehmanoncloud9/crime-management-system](https://github.com/rehmanoncloud9/crime-management-system)

- Designed a 48-table relational database schema (MariaDB) powering a production-grade desktop application for law enforcement operations.
- Implemented Hibernate ORM mappings, role-based access control, a reporting system, and core backend logic.

**SmartGo — Java, Swing, SQL** *Completed*

[github.com/rehmanoncloud9/SmartGo](https://github.com/rehmanoncloud9/SmartGo)

- Developed a travel booking desktop application with authentication and a payment module.
- Implemented booking management, a search system, and the underlying database layer.

**Course Files Organizer — Python** *Completed*

- Automated the organization of academic course files into a structured directory hierarchy using Python.

[iamabdulrehman.vercel.app](https://iamabdulrehman.vercel.app)

- Built a full-stack personal portfolio using TanStack Start (React, SSR) with a custom-built CMS for content management, deployed on Vercel via Nitro.
- Delivered the project across 10 planned build phases, from architecture through deployment.

## EDUCATION

---

**Bachelor of Science in Computer Science — National University of Sciences and Technology (NUST)**

*Expected 2029*

## CERTIFICATIONS

---

- Google Antigravity National Hackathon 2026 — Participation Certificate
- Punjab Boy Scouts Association — Leadership Training

## LANGUAGES

---

English, Urdu, Punjabi
